授業到達目標の達成度	Five of the six units listed in the syllabus were studied. The students did well with the speaking and listening tasks. Telephone messages were difficult for the students, so we spent extra time on them.						
反省点	For a class with this number of students, everything was successful. The students practiced in pairs. They also did conversations with their partners in front of me. However, if there were fewer students, the class would be better because each student would have more chances to speak and be corrected. Teachers should be paid more, have classes with fewer students, and not be expected to do a lot of office work. The time spent doing office work could better be spent on improving teaching methods.						
来年度の計画	Next year the course will be taught by a different teacher.						
授業評価アンケートに対するコメント	The students understood the content and seemed satisfied. There were some very positive statements about the course.
