授業到達目標の達成度	All six units listed in the syllabus were studied. The students did well with the speaking and listening tasks.							
反省点	Most students were highly motivated and did all speaking, listening, and writing activities very well, but if there were fewer students, the class would be better as each student would have more chances to speak. Most students gave a good evaluation for this class, but a few did not. There were 40 students in this class. Other universities have a maximum size of 30 or 24 for speaking classes. I hope Kinki University will make the class size smaller.							
来年度の計画	Next year the course will be similar. The text was very good and the on-line homework was good too. More efforts will be made to help the students improve their speaking and listening skills.							
授業評価アンケートに対するコメント	The students understood the content and most seemed satisfied. I understand that for a few there was some dissatisfaction which I think is a problem with the number of students in this classroom.
